

UNTDA Archives and Newsletter Report

Tuesday - June 9, 2020

Gents,

A very brief report this time out.

UNTDA_Master_List_1.xlsx

In the previous report (March 31, 2020) the critical nature of this file to UNTDA operations was elaborated on. It includes information that is nowhere else available. An offer was made to forward it on to Directors. To my surprise, no one took up that offer.

Also in the last report, a numerical summary was provided as to the breakdown of key elements of the Nominal List. That will not be repeated here because there are no dramatic changes in those numbers and in any event this information can be derived by anyone at any time, from the publicly available and Directors-only Interactive Lists.

There have been no changes in the structures of the publicly available Lists, nor the underlying data files.

Newsletter:

A long overdue Newsletter was issued on May 24th. Distribution was to 917 by email, plus 12 by snail mail. When the dust cleared on the mail-out aftermath, there were 3 confirmed bounces and 1 request-no-contact.
