

NRAC Archives Report - for December 11, 2023

Nominal, Members and In Memoriam List:

Whenever there is a system-wide mailout, there is a resultant uptick in changes to our underlying data. In the last quarter there were 3 such mailouts; Connexions, the Annual Member Survey and a Regalia bulletin. Changes to contact information, membership status, discovery of deceased members and entirely new contacts, are the order of the day with mailouts. A new type of change occurred in the last quarter, that is the re-assignment of the Program in which a member entered the NavRes. A significant number of members who were initially logged in under the various officer cadet programs, had prior NCM service, as did most of those logged in as CFR. When known, that prior service was noted in their biographical information, but now we can log them in as NCM, while still retaining their officer cadet class-year connections as well. As that type of change becomes more prevalent, the data breakdowns will be skewed, as far as comparing them historically goes.
